

## ROCHESTER MARKETPLACE

Rochester, Minnesota

A 9,000 square foot retail center designed to house a Hallmark Gold Crown on an island site in a new retail development. The building design was dictated by multiple building setbacks and the desire to allow the building to become a beacon within the development. Interesting design features include the display tower with a decorative metal crown, a structural metal sunshade canopy, multiple massing elements and the decorative brick pattern which all serve to enhance the building's presence within the center.
